Internship Logbook

Student Name: **MUBIRU GEOFFREY**

mubisicff20@gmail.com

Month: **JUNE 2017 [MONTH ONE]**

Abon

Target	Achievements	Challenges	Lessons Learnt
<p>WEEK TWO → Orientation on the general workshop requirements and operation of machines at the company</p>	<p>I got to know about different machines like grinder, welding and use simple tools like measuring instruments, vice, sand</p>	<p>- Some machines were new to me, so I had to start from zero which could hinder me during the work.</p>	<p>- Do not operate any machine without permission of the supervisor or prior knowledge of operation of the machine. Always ensure that you have a safe procedure before operating a machine.</p>
<p>WEEK THREE → Fabrication process of measuring tools and tools</p>	<p>I was also able to understand and to understand and tools will include practically know welding process, how to plan the cutting, marking, measuring, marking and cutting the pieces</p>	<p>- Eye protection is especially during welding due to the intensity of using safety glasses very effectively.</p>	<p>- Arc welding is very harmful to the eyes wear safety glasses always take appropriate dimensioning and cutting measurement during measurement.</p>

<p>WEEK FOUR</p> <p>Dimensions Safety and incuts will include identification workshop and how to control them</p>	<p>that make basic different safety procedures understand included using safety boots, safety shoes, in cases where appropriate.</p>	<p>- my work is very fast from the piece of work therefore some times I could reach late work some work have been already performed thus hardly my opportunity to work more.</p>	<p>- when work is not safely than it's work. - hazards can be causing people or can also be hazards the don't follow work procedures. - it better to control hazards than to or meet injuries</p>
