

HEST INTERNSHIP LOG BOOK

Student Name: WAISWA JOSEPH

HEST No: IPITKYU/127/J6

University No: 15/UT/15818/STC/GV

Organization: ALINYIKIRA ECO INVESTMENTS LIMITED

Department: CHEMISTRY

Unit: PRODUCTION AND QUALITY CONTROL TECHNIQUES

Supervisor: MR YUSUFU

Contacts: 0702698549

Date:	Targets	Achievements	Challenges	Lessons Learnt
Week 1	Covered cosmetics manufacturing	I achieved the goal of what herbal cosmetics is all about and differentiator it.	Obtaining a specific herb for a specific disease is hard and therefore it challenged	I learnt that the herbal which is added to the cosmetics is aimed at treating disorders.
Week 2	Raw materials selection	I know to select raw materials for cosmetics like white oil, lemon, yellow and others which give a good product.	Some raw materials required are not always available	When heating a mixture of white oil and waxes, moderate temperatures are used.
Week 3	Cosmetics formulation/quality control	Skin care herbal and soap (bathing) soap manufactured	No instruments used for quality control analysis.	Cosmetics takes less time and then it packed while soap is left for around 4 days to harden.
Week 4	Packaging and labelling	Packing and labelling methods learnt and achieved.	Packing process takes a lot of time and is tiresome	Packets are labelled before being used for packaging and a big box is packed in (6x12) dimensions.

Supervisor's comments:

- Waiswa Joseph is fully admitted ~~to~~ and is undertaking internship at Alinyikira Eco Investments Limited from 14th June to 14th September 2017
- He is very good as he has grasped the concepts in manufacture of cosmetics, raw material selection, formula and packaging.
- Good conduct.
