Internship Logbook

Student Name: KITENTE BUDALAH

Month: MAY

Target	Achievements	Challenges	Lessons Learnt
Finalizing with the front end and backend that is Final uploading of the exact images, content and other information.	Images, content and other information were uploaded and both frontend and backend pages were fully completed and work effectively.	Inadequate exact content for the website Lack of money for the data to carry out some bit of research concerning the website. Time consuming due to some code errors which had to be overcome	Learnt how to overcome code errors during development.
Integrating the front end and backend and also creating database connections so that the whole website can communicate fully with each part of the system. Hosting the website.	Both the frontend and backend were fully configured and database connections were also fully configured and now the whole system can fully functional. Finally the website was hosted and it now works online.	Unstable internet connection required to carry out more research concerning the venture tour site and also hosting the website. Hard time during hosting since it was my first time to host a website.	Learnt how to upload and host the website on the high cloud servers.

Supervisors Comment: *Good work*
